45%
by 2025

Current RPS
46%

LA100 Plan Target
55%
by 2025

Current Target
On Track

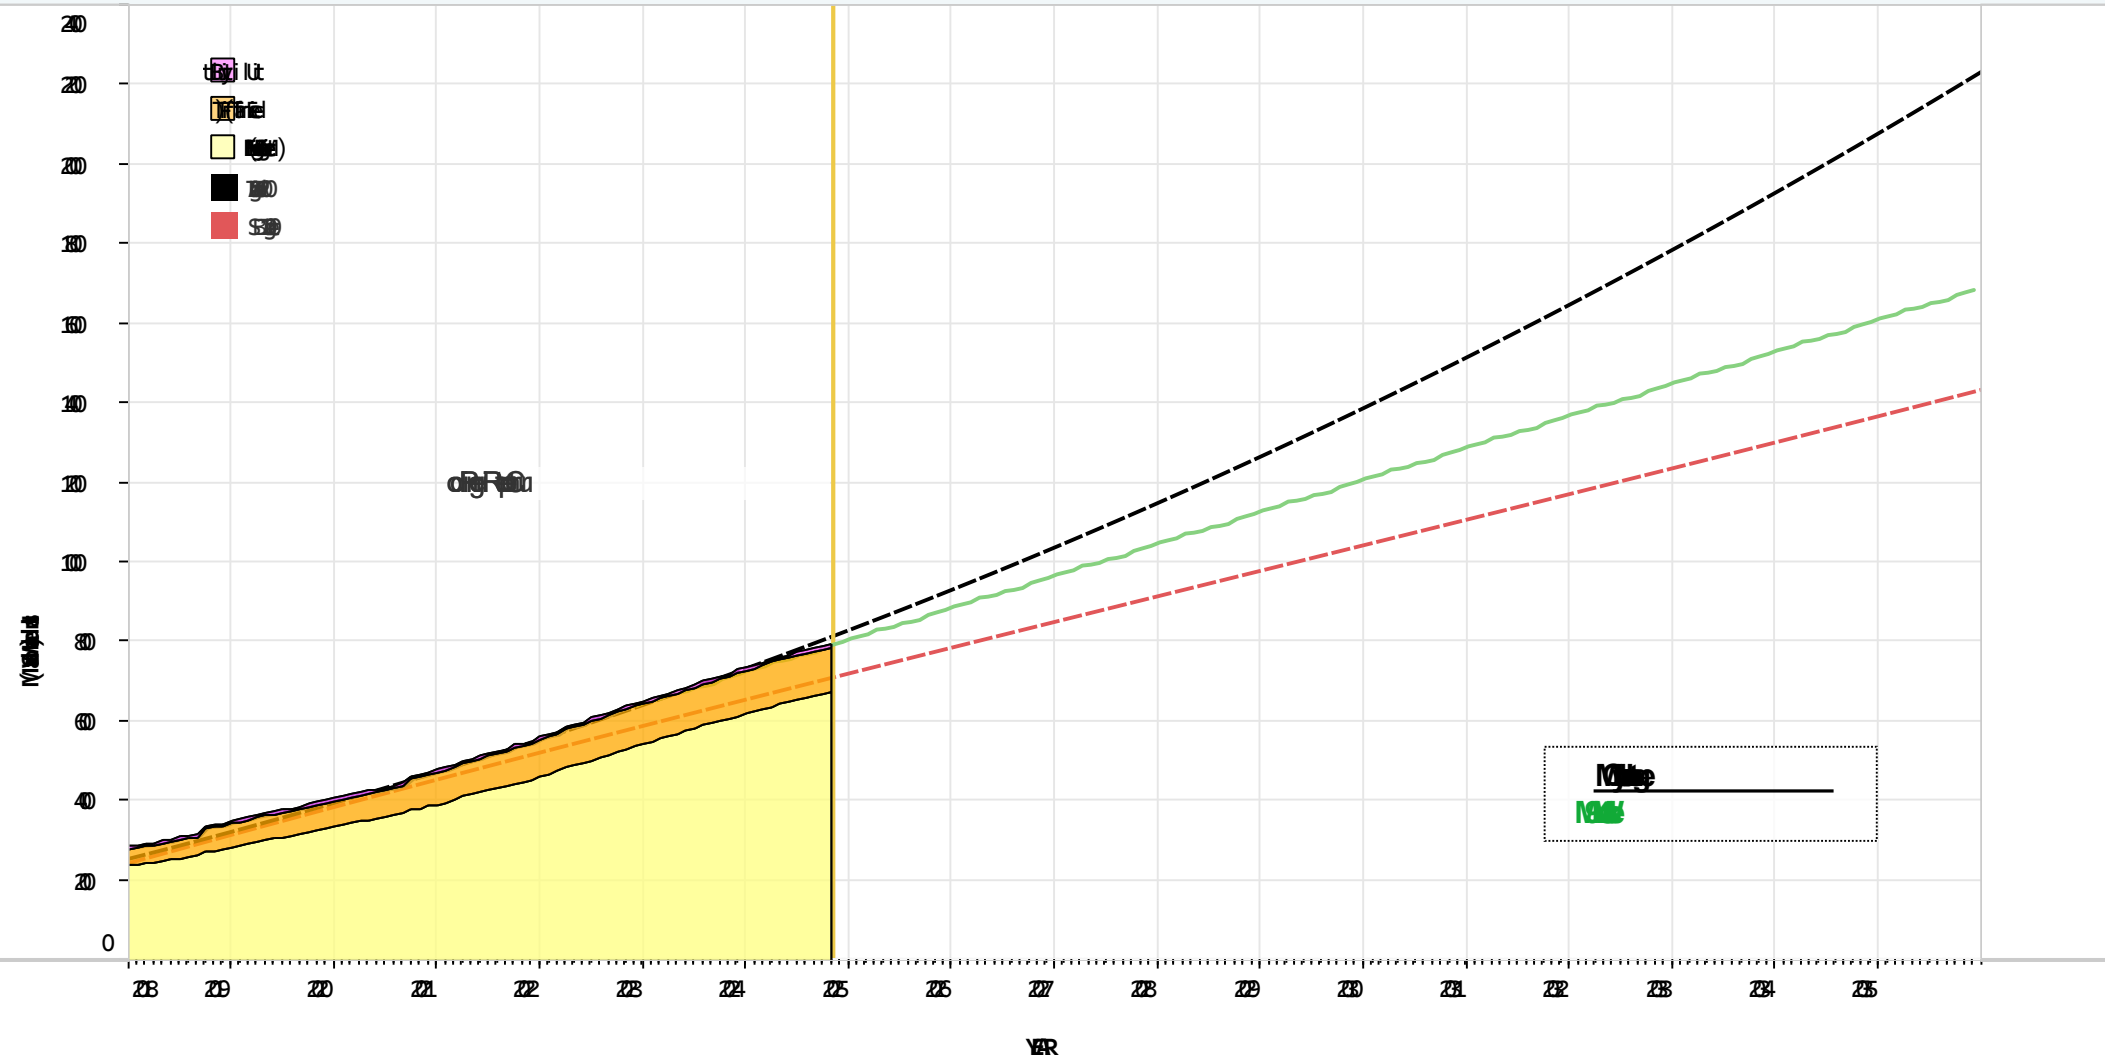

Long-Term Target
Needs Attention

This graph shows LADWP's **tentative** Renewable Portfolio Standard (RPS) projections. Values up to the Current Reporting Period are based on in-service projects. It also shows our LA100 Plan Target (black) and the SB 100 RPS compliance target (red). The reported Current RPS percentage may fluctuate month to month based on renewable generation forecast adjustments for large scale projects.

*Values after the Current Reporting Period are based on projects that are planned or under construction through 2030. The **forecasted** LADWP RPS percentage trendline (light green) is based on historical build rates and not future planned projects.
